

InspectVue R3, now in its third generation, offers you the ability to generate a concise, accurate, and comprehensive narrative report in record time, and gives you the edge over your competition. InspectVue Single-Touch checklist type selection process speeds through the inspection process, generating a narrative report in less time than it takes to complete a check-sheet report! Choose from a library of over 11,000* narratives that are designed to create a high-quality professional residential inspection document.

CONCISE

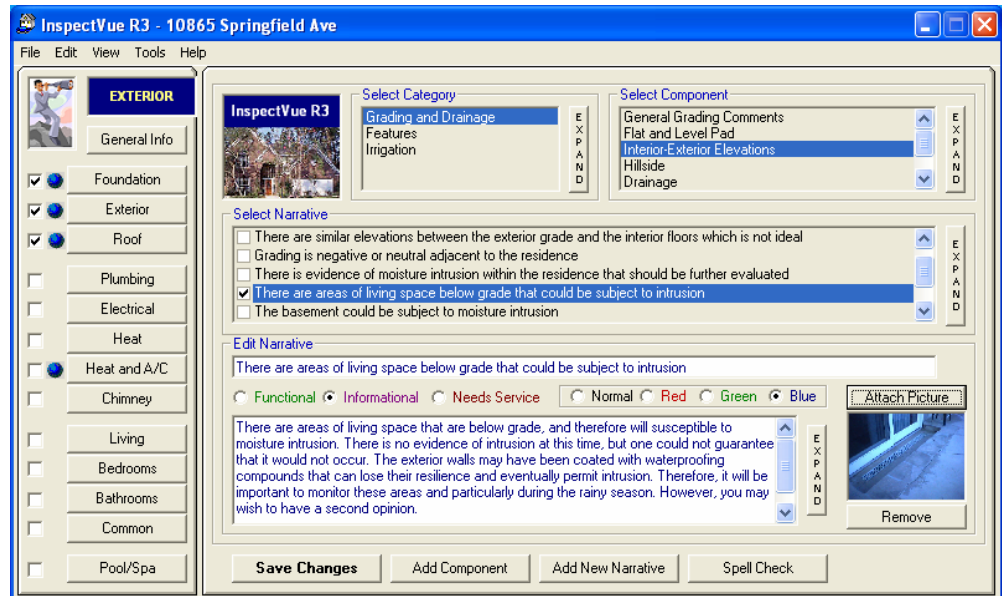

ACCURATE

COMPREHENSIVE

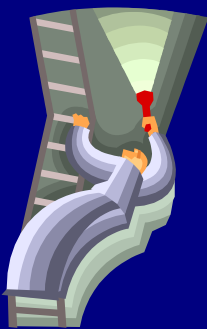

InspectVue R3™ has been designed from the ground up to be the easiest to use inspection report writer available. After only a few hours of familiarization, you will be completing a field inspection with the speed of a check-sheet, but providing a sophisticated narrative and summary report.

“As a relatively new inspector, I sampled three other report-writing programs before buying InspectVue R3. I can honestly say that I was up and running with InspectVue within a few hours. But what has been most gratifying is the prompt personal support that I have been given, and I highly recommend this program to any inspector that might be looking to produce a professional report with a program that has a nearly zero learning curve.” **-Glenn Stewart, Highlander Home Inspection**

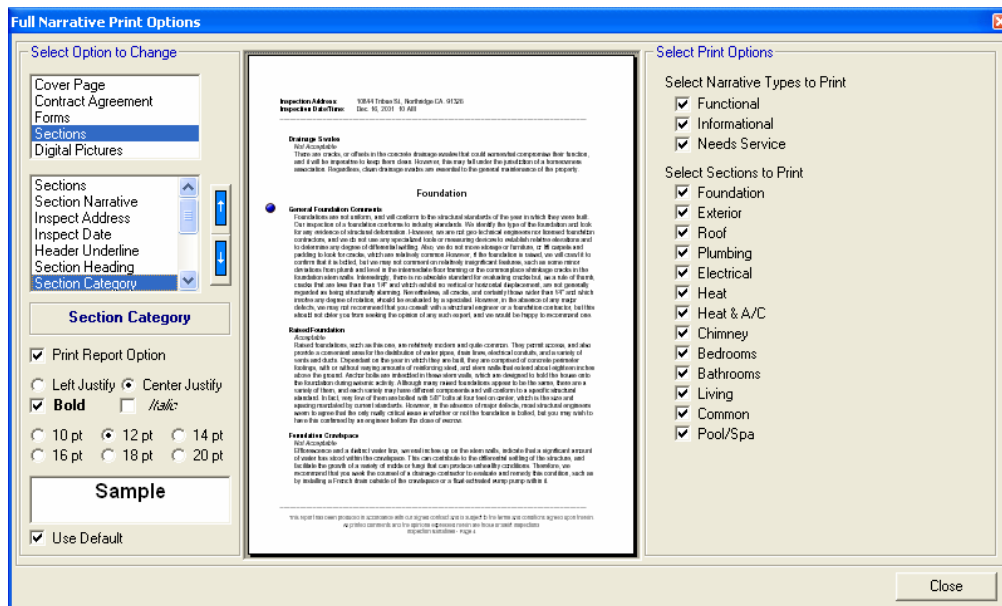

If you can click a mouse, you will be able to accurately create complete inspection reports for real estate agents and their clients. InspectVue R3™ is a stand-alone program. No word processor or database program knowledge is required yet all elements of the report can be easily modified. The program leads you through the inspection process and culminates in the creation of an on-site report derived from a selection of thousands of inspection narrative elements. Furthermore, the final report may include pictures keyed to specific narratives and, if you so choose, the ability to color code any portion of the narrative text. InspectVue Single-Touch Technology will enable you to complete an inspection and deliver a highly sophisticated, professional residential summary and narrative report in record time.

InspectVue R3™ with Single-Touch Technology

Single-Touch Technology speeds through the process of creating a professional and highly sophisticated narrative report in record time. InspectVue R3™ is all you need to create professional reports.

- ▶ Single-Touch technology allows you to complete your inspections on or off-site.
- ▶ Edit narrative selections to suit your individual reporting needs.
- ▶ Add new narratives “on-the-fly” during the observation process.
- ▶ Color-code narratives for added emphasis
- ▶ Use line numbers for quick and easy reference
- ▶ Generate summary reports for real estate agents to quickly assess possible issues
- ▶ Print full narrative reports that include a complete array of print options
- ▶ One-Touch spell check of narratives, comments and notes
- ▶ Modify/add/delete any text that prints on a report using the included InspectVue Library Editor
- ▶ InspectVue R3™ expanded narrative library consists of over 11,000 narrative elements.
- ▶ Preview and email reports with the available InspectVue PDF Print Driver
- ▶ Add pictures to illustrate specific areas or components
- ▶ Print marketing letters, create invoices and schedule inspections with InspectVue BackOffice
